Terms – Text-Based Games

Room
Description

[defense room]

This is the examination room, where defenses are held occasionally. It is full with several **tables** and **chairs**. There are a few **people** sitting on them. Some of them are even sleeping. The **projector** is running and the light is dim, so that everyone is able to see the **presentation** being given.

Exits

There are two obvious exits: left and right.

Two stern-looking examiners are present.

> flee

I don't understand what you mean.

> RUN AWAY

What?

> sigh

You sigh.

> continue presentation

You continue giving your presentation.

Objects

Interaction

Terms – Playstyles

Playstyles that
occur in MUDs

adapted from
Bartle (1996)

Terms – Navigation

Allocentric Representation

Egocentric Representation

Terms - Immersion

Immersion involves a certain feeling of presence within the game environment and not the actual world the player is in.

Immersion includes the identification with ones avatar or character.

Immersion is easily disrupted.

Immersion only occurs if the player accepts the rules set by the game, be it social rules, physical rules or others.

Terms - Immersion

Immersion involves a certain feeling of presence within the game environment and not the actual world the player is in.

Immersion includes the identification with ones avatar or character.

Immersion is easily disrupted.

Immersion only occurs if the player accepts the rules set by the game, be it social rules, physical rules or others.

Immersion is the player's undisrupted and focused engagement with the game they are playing.

Hypothesis

Game Setup

Stables

Hallway

Rooms in the house

Outside rooms

Pond

Garden

Pit

1 kitchen

2 Albert's room

3 Mort's room

4 bathroom

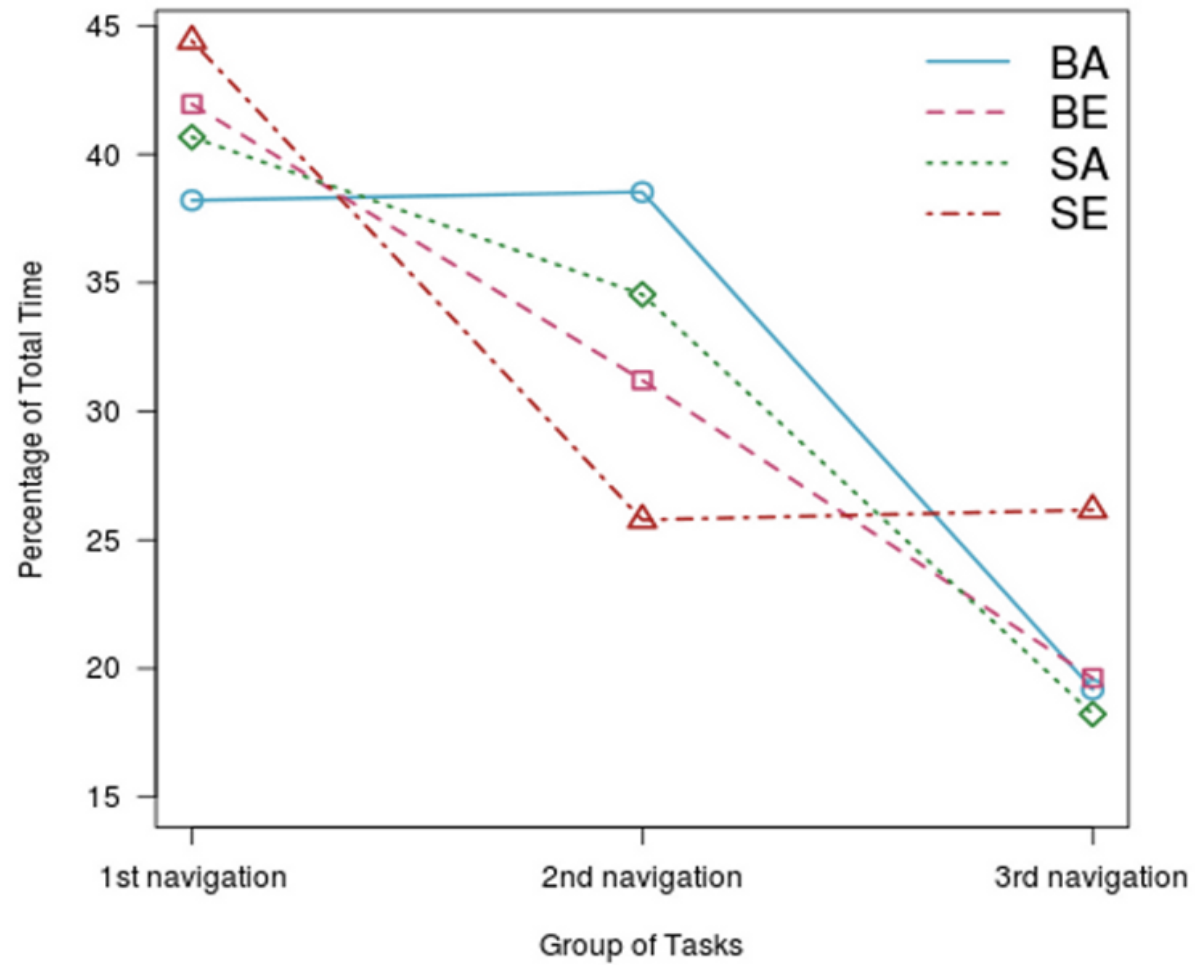

5 top of stairs

Main Study - Findings

Main Study - Findings

CER =
Command Error Rate

PSCER =
Player Side Command
Error Rate

Main Study - Findings

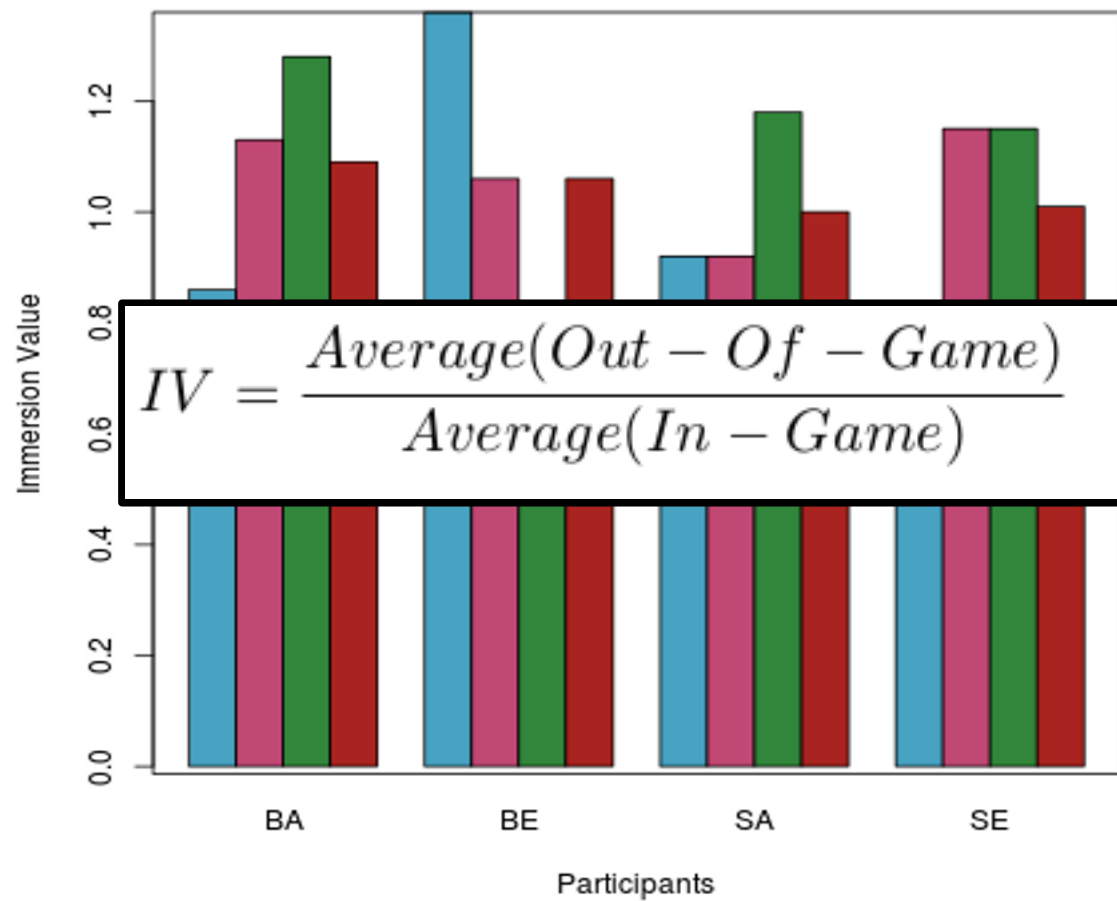

Main Study - Findings

Participant	In-Game	Meta-Game	Out-Of-Game	Silence
BA	40.54%	18.84%	0.24%	40.38%
BE	16.75%	18.36%	0.77%	64.12%
SA	40.69%	13.46%	0.09%	45.76%
SE	21.65%	7.62%	0.08%	70.66%

Main Study - Findings

Main Study - Findings

Main Study - Findings

Main Study - Findings

- Encoding of 'forward' as 'north' for sighted players
- No equivalent for that for blind players

Task	BA	BE	SA	SE
Time Est. Precision	0.2347	0.0015	0.0103	0.0060
Room Est. Accuracy	2.00	2.44	2.60	2.87
Egocentric Loc. Correct	0.33 (6/9)	0.33 (3/9)	0.83 (7/9)	2.17 (9/9)
Allocentric Loc. Correct	2.33 (9/9)	0.17 (2/9)	1.67 (7/9)	1.17 (8/9)

Interpretation - Limitations

- Language of the game vs. native language of test participants
 - Test sessions recorded by only one person
 - Data evaluation by only one person
- > Bias Issues

Interpretation – Validity

- Findings helpful for the developers of text-based games
 - Accessibility
 - Game Dynamics
- Findings helpful for knowledge about navigation through virtual space
- Findings helpful for the research community
 - Text-Based Games as tools for research into perception and the influence of different representations
- Future work in the development of maps that are intuitive to use by blind users

The End

Thank you very much for your attention.

Additional Information - Pilot Study

Identifier	Blind/Sighted	(Un)Experienced	Allo-/Egocentric
PB1E	Blind	Unexperienced	Egocentric
PB2E	Blind	Experienced	Egocentric
PS3E	Sighted	Unexperienced	Egocentric
PS4A	Sighted	Unexperienced	Allocentric
PB5A	Blind	Unexperienced	Allocentric
PS6E	Sighted	Experienced	Egocentric
PS7A	Sighted	Experienced	Allocentric
PB8A	Blind	Experienced	Allocentric

Additional Information - Pilot Study

- Experienced players should be excluded
- The task description needs narrative framing
- Time on Task shouldn't be used as a stand-alone measurement
- To produce meaningful results, the questionnaires have to be enhanced
- Log creation has to be done outside of GnomeMUD
